DETAILED ACTION

Applicants' arguments, filed 09/26/2008, have been fully considered. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Election/Restrictions

Newly submitted claims 8-11 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: the common technical feature between the previous claims and the new claims is not a special technical feature because the common technical feature, a composition comprising alloimperatorin, is taught by Duke (see below).

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 8-11 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1 and 3 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The disclosure of a composition that is in the form of a skin softener is not considered to be adequate enough to support the claim where the composition “further comprises a skin softener”. There is no adequate support found in the originally filed specification for a composition further comprising a skin softener.

Claim Rejections - 35 USC § 102

Claim 1 was rejected under 35 U.S.C. 102(b) as being anticipated by James Duke. **This rejection is maintained.**

Claim 1 was rejected under 35 U.S.C. 102(b) as being anticipated by Harborne et al. **This rejection is maintained.**

Applicant has amended the claim to require the presence of a skin softener; however, Ammi Majus contains the emollient softener, oleic acid¹.

Claim Rejections - 35 USC § 103

Claim 3 was rejected under 35 U.S.C. 103(a) as being unpatentable over USP 5,176,919 in view of Duke and Harborne et al. **This rejection is maintained.**

In response to applicant's argument that the limitation, "for promoting synthesis of collagen", distinguishes the instant claims from the prior art since there is no disclosure or suggestion in the cited prior art references for this use, a recitation of intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim (as it does here).

No claims are allowed.

Conclusion

¹ USP 6,231,837 – verifies that oleic acid is a skin softening and soothing emollient that can be used in topical compositions (col. 21, ll. 24-27 and 41).

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
